

## SOCONY TRACTOR OIL

Grain in the Barn  
Not in the Straw Pile

Clean threshing depends on keeping the cylinder revolving at normal speed requires ample, dependable power. Maximum power depends on proper lubrication.

The normal operating heat of a tractor engine is inevitably high, and the partial condensation on cylinder walls of the heavy fuels commonly used on tractors adds to the difficulty of lubrication. Therefore, tractor engines require a special oil which will resist this decomposition and diluting action of heat and fuel. Unless the lubricant maintains its body under these conditions, it will fail to give maximum protection against wear.

Socony Tractor Oil is manufactured especially to meet these requirements. Use Socony Tractor Oil and Socony Oil Greases and Fuels. They will keep your tractor working at full efficiency and economy. Sold where you see the red, white and blue Socony Sign.

There is a SOCONY LUBRICANT of the right consistency for every mechanical need.
